"LAND ACT"

INSTRUCTIONS REGARDING PERMANENT SURVEY MONUMENTS

THE following instructions have been prepared for the guidance of British Columbia Land Surveyors and are issued under authority of clause (c) of section 7 of the "Land Act," chapter 175 of the "Revised Statutes of British Columbia, 1948."

These instructions replace the Regulations Regarding Permanent Survey Monuments issued the 1st day of May, 1947, and the amendments thereto, issued the 24th day of June, 1948, and will come into effect the 28th day of May, 1951, and apply to all surveys completed after that date.

1. A permanent survey monument shall consist of a standard post and any bearing-tree, cairn, mound, pit, or trench that may be established as hereinafter described.

2. The standard post shall be one of three types, namely: (i) The standard rock post, (ii) the standard concrete post, and (iii) the standard pipe post.

3. The *standard rock post* shall be used to mark every corner which falls on bedrock, a relatively immovable boulder, or a permanent stone or concrete structure. This post shall be securely set into a $\frac{7}{8}$ -inch hole drilled in the rock, or concrete, to the full depth of the shank of the post.

4. The *standard concrete post* shall be used to mark every accessible corner or angle where a standard rock post cannot be used satisfactorily. The concrete post shall consist of a standard rock or pipe post set in the centre of and flush with the top of a concrete monolith. This monolith shall be in the shape of a truncated pyramid at least thirty inches high, at least eighteen inches square at the base, and ten inches square at the top. Alternatively, the monolith may be in the shape of a truncated cone at least thirty inches high, at least twenty inches in diameter at the base, and twelve inches in diameter at the top. Either model shall be poured in position, or pre-cast and placed in position, in such a manner that the top is not more than six inches above ground-level. A form must be used for at least the top nine inches of the monolith.

5. The *standard pipe post* shall be used at all other corners and should be planted so that the top is flush with the ground.

6. The required type of standard post shall, except as herein provided, be set at each corner or angle of the lot being surveyed, including any common corner at which a post of an inferior type is found. In the case of the survey of a very small land, or foreshore, lot, a variation of the post requirements may be permitted if a request is received from the surveyor before the survey is made.

7. Each standard post shall be set with the crown on the cap toward the north and with the corner point, as nearly as possible, at the centre of the cap. After setting the post, the true corner point shall be marked by a small hole punched or drilled in the cap.

8. The space provided on the cap is to be used to indicate diagrammatically the direction of the boundary-lines and the numbers of the lots, sections, or blocks adjoining the corner. The surveyor shall also mark upon the cap the year in which the post was set and the registry number of his commission as a British Columbia Land Surveyor. In the case of a witness-post, it shall also be marked with the letters "WT." followed by the distance and direction to the corner witnessed. This post marking is best done with $\frac{3}{16}$ -inch steel dies of the letters and numbers required.

9. The position of every post shall be referenced by at least three bearing-trees wherever trees are available. The distance to each bearing-tree shall be measured from a point four feet vertically above the top of the post to the face of the blaze.

10. Cairns or earth mounds shall be built to reference the position of all posts set on lots of forty acres or over, except as provided in clause 12. At a true corner post, the cairn or mound shall be in the shape of a pyramid five feet square at the base and thirty inches high; its centre should lie due south of the post, with one corner adjoining the post. At a witness-post, the cairn or mound shall be conical, six feet in diameter at the base and thirty inches high. It should stand on the opposite side of the post from the corner witnessed, with its centre three feet from the post. Should it be impractical to build the cairn or mound as specified, its position in relation to the monument may be varied and a notation indicating this variation given in the field-notes.

11. Pits and trenches may be used to reference the position of posts, in addition to, or in lieu of, cairns or mounds, except as provided in clause 12. Where pits are used, four are required at a corner post. These pits shall be three feet square, eighteen inches deep, and shall be so situated that the centre of each pit lies seven feet from the post on a line at forty-five degrees to the meridian through the post. At a witness-post, a circular trench two feet wide, one foot deep, and of eight feet inside diameter may be used. The

centre of the trench circle shall lie three feet from the post on the opposite side from the corner witnessed.

12. Cairns, mounds, pits, or trenches must not be built on a travelled road or placed in such a position as to create a hazard, or interfere with existing improvements.

13. A wooden post shall be set to indicate the position of a standard post which is not referenced by a cairn, earth mound, pits, or trench. This wooden post shall be of triangular cross-section, not less than three inches wide on any face, firmly set to stand at least thirty inches high and marked "MON." or "MONUMENT" on the side facing the standard post.

14. The field-notes shall give complete information as to the method used to mark and reference each corner. A simple sketch of the post-cap will serve to indicate the markings thereon. The field-notes shall give a full explanation in any case where the required type of post (see clauses 3, 4, and 5) is not used.

15. The following abbreviations shall be used when preparing field-notes and plans:—

P.P.—Standard pipe post.

P. Rock—Standard rock post.

P. Con.—Standard concrete post.

Pit—Four pits.

P.P.M.—Standard pipe post and mound.
